

Bilag til global opvarmning

Figur 1: Model over atmosfærens strålingsbalance

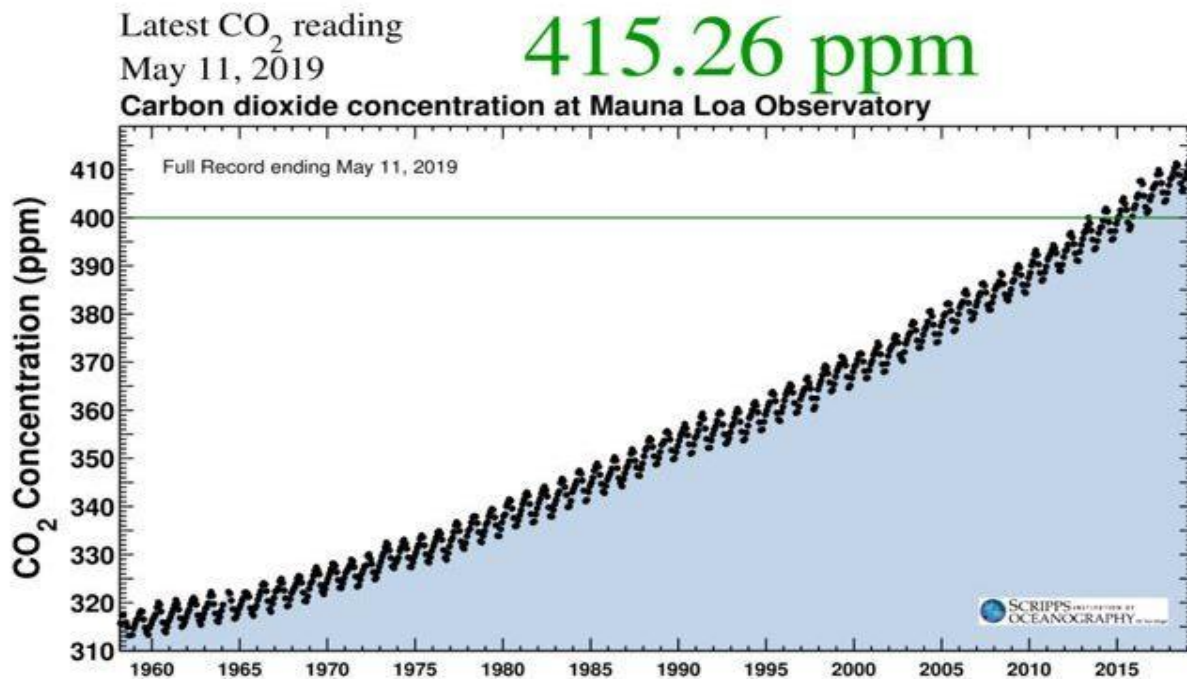

Figur 2: Afvigelser i den globale gennemsnitstemperatur i forhold til referenceperioden (1961-90)

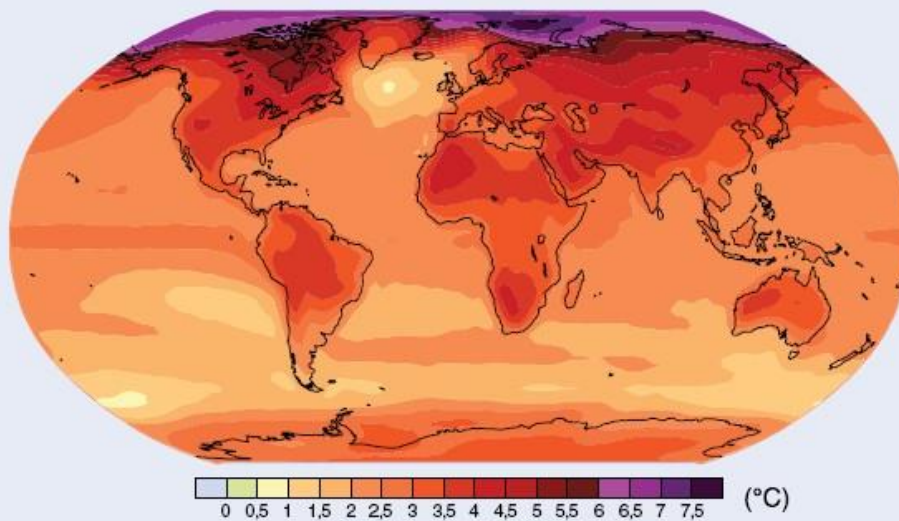

Source: J.R. Peill, J. Jouzel, et al. Climate and atmospheric history of the past 420 000 years from the Vostok ice core in Antarctica, Nature 399 (3/June), pp 429-436, 1999.

Figur 3: Co2 koncentration og temperaturafvigelser i forhold til 1950 gennem 400.000 år

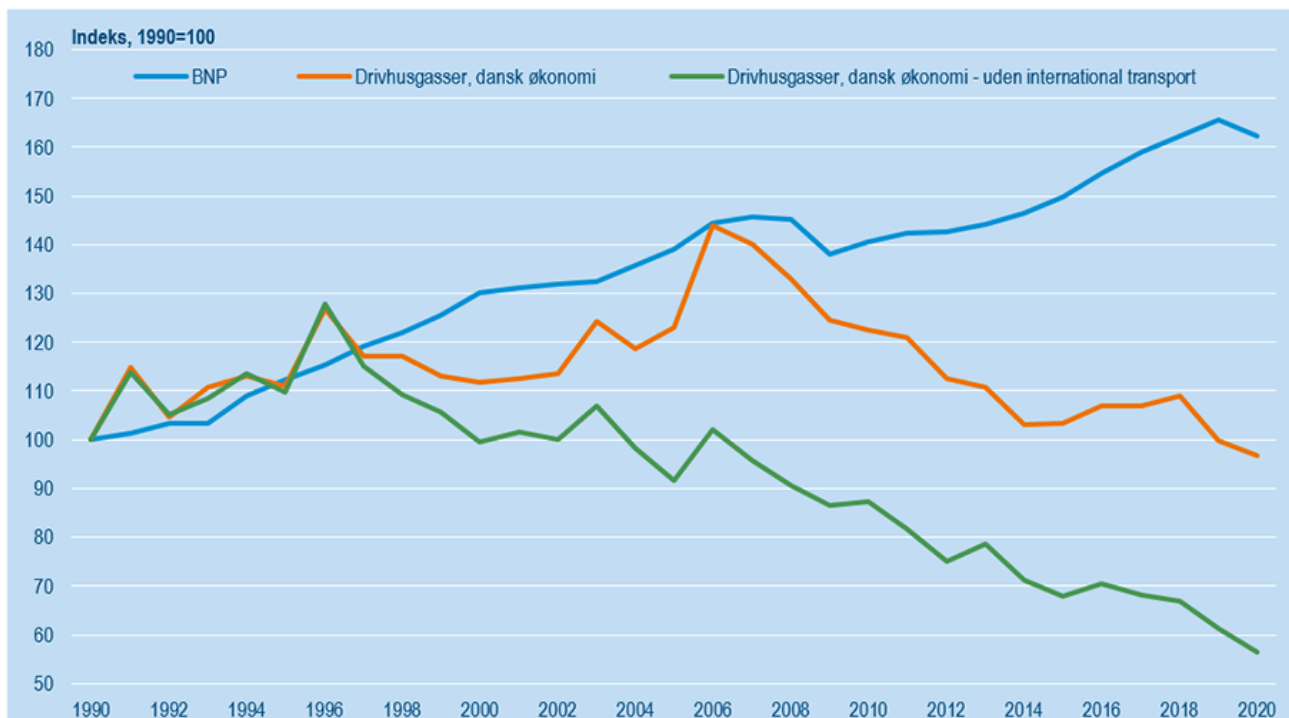

Figur 4: Keeling-kurven med atmosfærens CO₂ koncentration 1958-2019

Geografisk mønster for overfladeopvarmning

Figur SPM.6. Forventede ændringer i overfladetemperaturen sidst i det 21. århundrede (2090-2099). Kortet viser multi-AOGCM-gennemsnits-prognosen for SRES-scenariet A1B. Alle temperaturer er i forhold til perioden 1980-1999. (Figur 3.2)

Figur 5 Forventede temperaturstigning i slutningen af det 21. århundrede

Figur 6: Danmarks udledning af DRIVHUSGASSER 1990-2020
